

Using Computers in Cardiology style in L^AT_EX and Miktex

2.5 for Windows XP

by Mariano Llamedo Soria

July 13, 2016

1. Create the following folders:

`$MiktexInstallFolder$\tex\latex\CinC`

`$MiktexInstallFolder$\bibtex\bst\CinC`

2. Get the the following files:

`cinc.cls` then move it to `$MiktexInstallFolder$\tex\latex\CinC`

`balance.sty` then move it to `$MiktexInstallFolder$\tex\latex\CinC`

`cinc.bst` then move it to `$MiktexInstallFolder$\bibtex\bst\CinC`

3. Click on *Start -> Programs -> Miktex 2.5 -> Settings*.
4. In the *General* tab, click on *Refresh FNDB*. Then click on *Ok* and leave.
5. This last step means rehashing L^AT_EX distribution. For others distributions try the *texhash* command.
6. Copy `article.layout` from `$LyXFolder$\Resources\layouts` to `$UserHome$\Application Data\lyx1.4.x\layouts`
7. `$UserHome$` is in my case `C:\Documents and Settings\mariano\`
8. Then rename the copied file to `CinC.layout`
9. Start L^AT_EX. *Tools Menu -> Reconfigure*.
10. Then restart L^AT_EX.
11. CinC style is configured and ready to work.
12. Try importing (*File Menu -> Import -> Latex (plain)*) some Tex file that uses the CinC style for example the templates generated online. Then you can view it in PDF format with `pdflatex` (*View Menu -> PDF (pdflatex)*).
